

Webinar #4 | 17 November 2026 | 10:00 – 12:15 CET | Register now!

What needs to happen for Europe's forests to deliver on the 2050 climate and biodiversity goals?

Achieving the EU's climate and biodiversity goals is crucial to healthy forests and a green, prosperous economy. The webinar will examine what needs to happen for Europe's forests to deliver on the climate and biodiversity goals for 2050: which management and policy shifts it implies, and which levers and levels of governance the EU needs to act on to stay on track. This webinar aims to:

- Present the forest-based policy pathways to climate, bioeconomy and biodiversity goals identified by the ForestPaths, ForestNavigator and PathFinder projects.
- Discuss (based on the results presented) what the main actions are that need to be taken to strengthen the role of forests in achieving climate neutrality and halt biodiversity loss and ensure socioeconomic sustainability.

Programme

10:00	**Welcome and introduction** Robert Mavsar, EFI
10:10	**Keynote: The EU Green Deal and the way forward for forestry** Frans Timmermans
10:40	**Results 1: ForestPaths – Forest-based policy pathways to 2050** Hans Verkerk, ForestPaths
11:00	**Results 2: ForestNavigator – Policy-relevant pathways and recommendations** Fulvio Di Fulvio, Julia Bognar, ForestNavigator
11: 20	**Results 3: PathFinder – Sustainable transition pathways** Daniel Di Marzo, PathFinder
11: 40	**Interactive segment** Including reflections from Frans Timmermans and the four project speakers
12.10	**Closing remarks** Robert Mavsar
