<b>Question 3</b>	My research institution is not a member of EFI yet, but interested to become a member. If the membership application is submitted before 30 June, would this be sufficient to be eligible to apply for the grant (considering that all other conditions are fulfilled, which they are)?
<b>Answer for question 3</b>	The organization to which the Applicant is affiliated has to be an EFI member organization (with membership not suspended) by the deadline 30 June 2022, 23:00 UTC.  It is not enough that the organization has applied for Associate or Affiliate membership by the deadline.
