

European Forest Institute

Grant process G-05-2023

Pilots of long-term climate impact forest monitoring sites

Questions and answers

Published 10 November 2023

#	Question	Answer
1.	Regarding the recently announced calls G-06-2023 and G05-2023, we would like to ask if the provided services for the two calls are accounted as service performance/service contract to EFI, or the services will be provided as Partner within the FORWARDS Horizont project (based on the grant regulations of Horizon RIA projects)?	These are grant calls and not invitations to tender/procurement. Applicants awarded a grant will enter into a grant agreement with EFI. The grant agreement template can be found on the grants website: https://efi.int/grants-training/grants/G-05-2023 and https://efi.int/grants-training/grants/G-06-2023
2.	For the budget justification, the overhead costs should be included in the 'other goods and services costs' category of the example table you provide with the project proposal template? or shall we add a new category (new line in the budget table)?	The budget and the costs therein must correspond to the implementation of the project and its activities. Indirect/overhead costs must not be included as also stated in the application form Part B in the budget instructions box.
3.	is there any restriction for participating in this call, in case of successful funding of a proposal I submitted for a previous call ('G-04-2023:Establishing Climate-Smart Forestry and forest restoration pilots in Europe')?	No, there are no such restrictions.
